UML Architecture Diagrams

SEN3244 — Software Architecture
May 2026

#	Diagram	Type
1	Use Case Diagram	Use Case
2	Sequence: User Login	Sequence
3	Sequence: Apply for Internship	Sequence
4	Sequence: Firm Reviews Applicant	Sequence
5	Class Diagram (Data Model)	Class
6	Component Diagram	Component
7	Deployment Diagram	Deployment

Diagram 1 — Use Case Diagram

Shows all actors (Intern, Firm, Google OAuth) and their 21 use cases with «extends», «includes», and «uses» relationships.

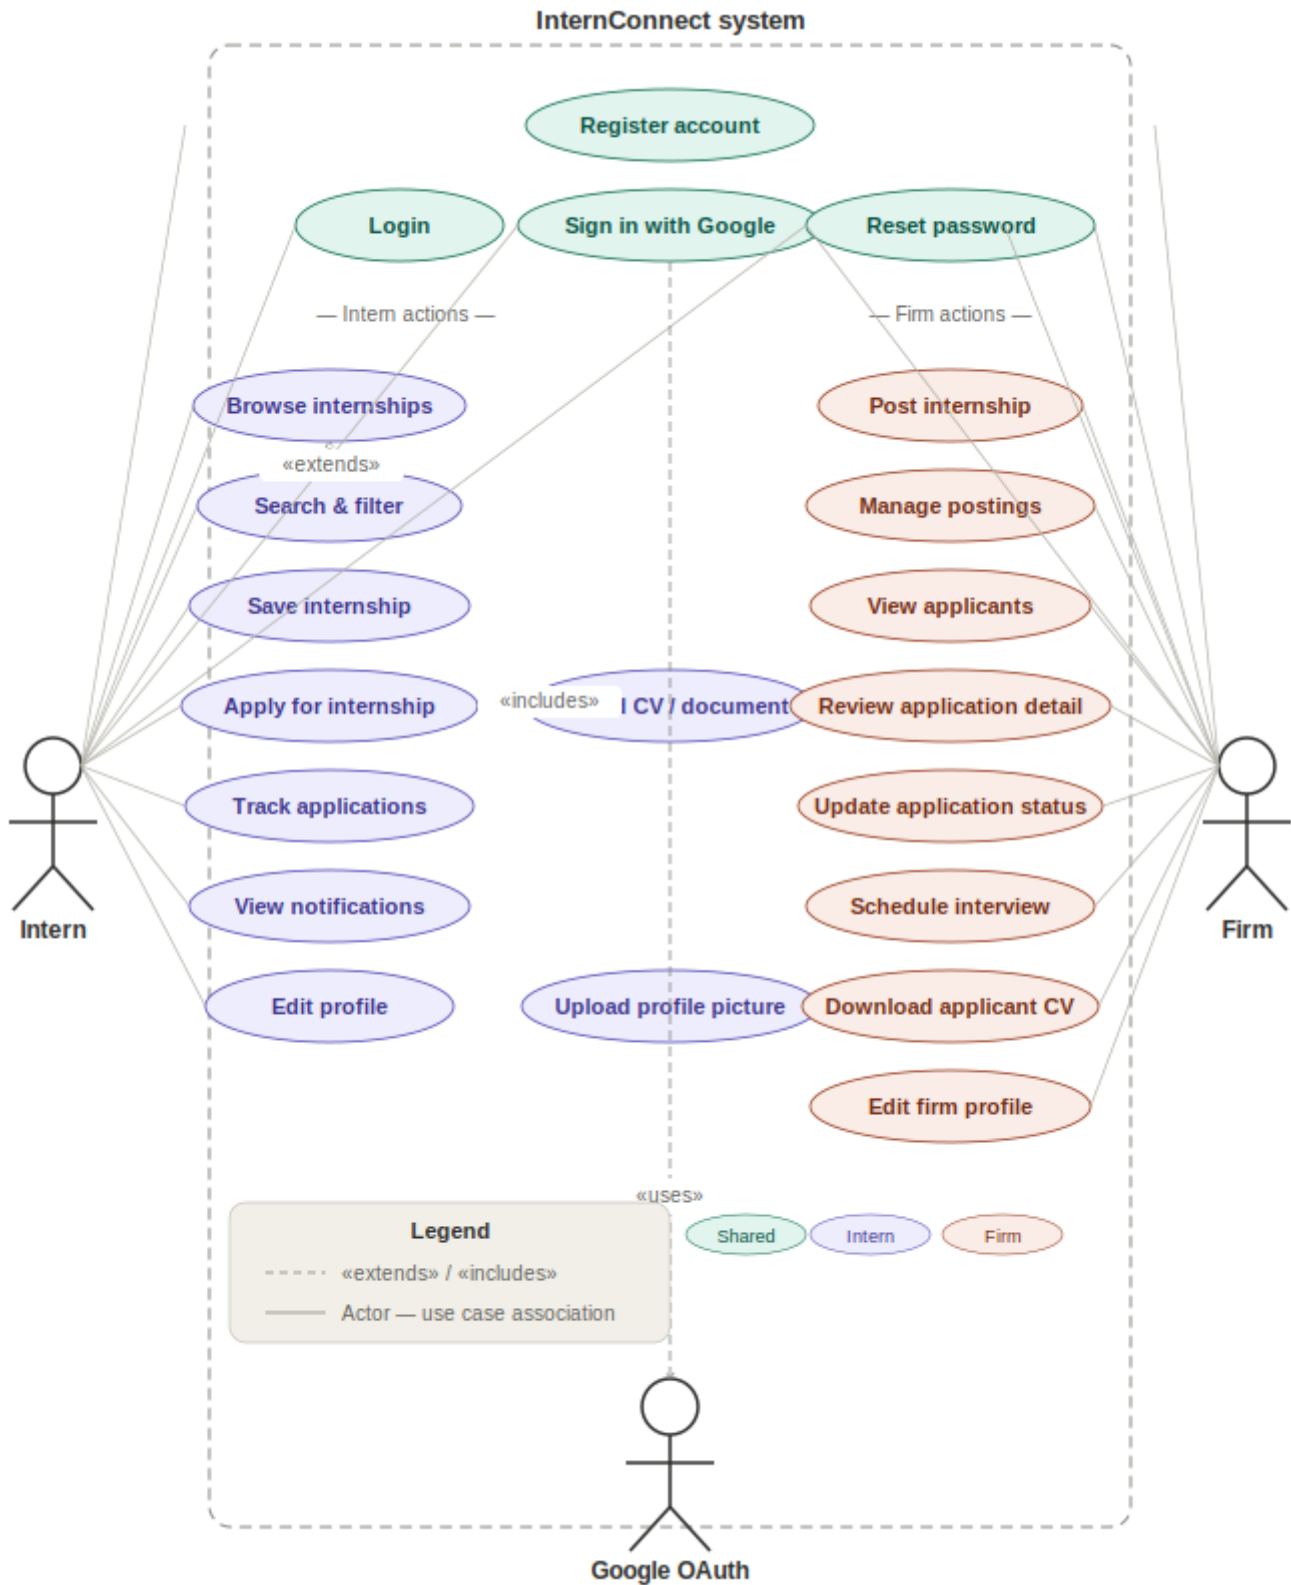

Diagram 2 — Sequence: User Login

Login flow from user input through LoginScreen → AuthContext → API Service → Express → Supabase DB → AsyncStorage.

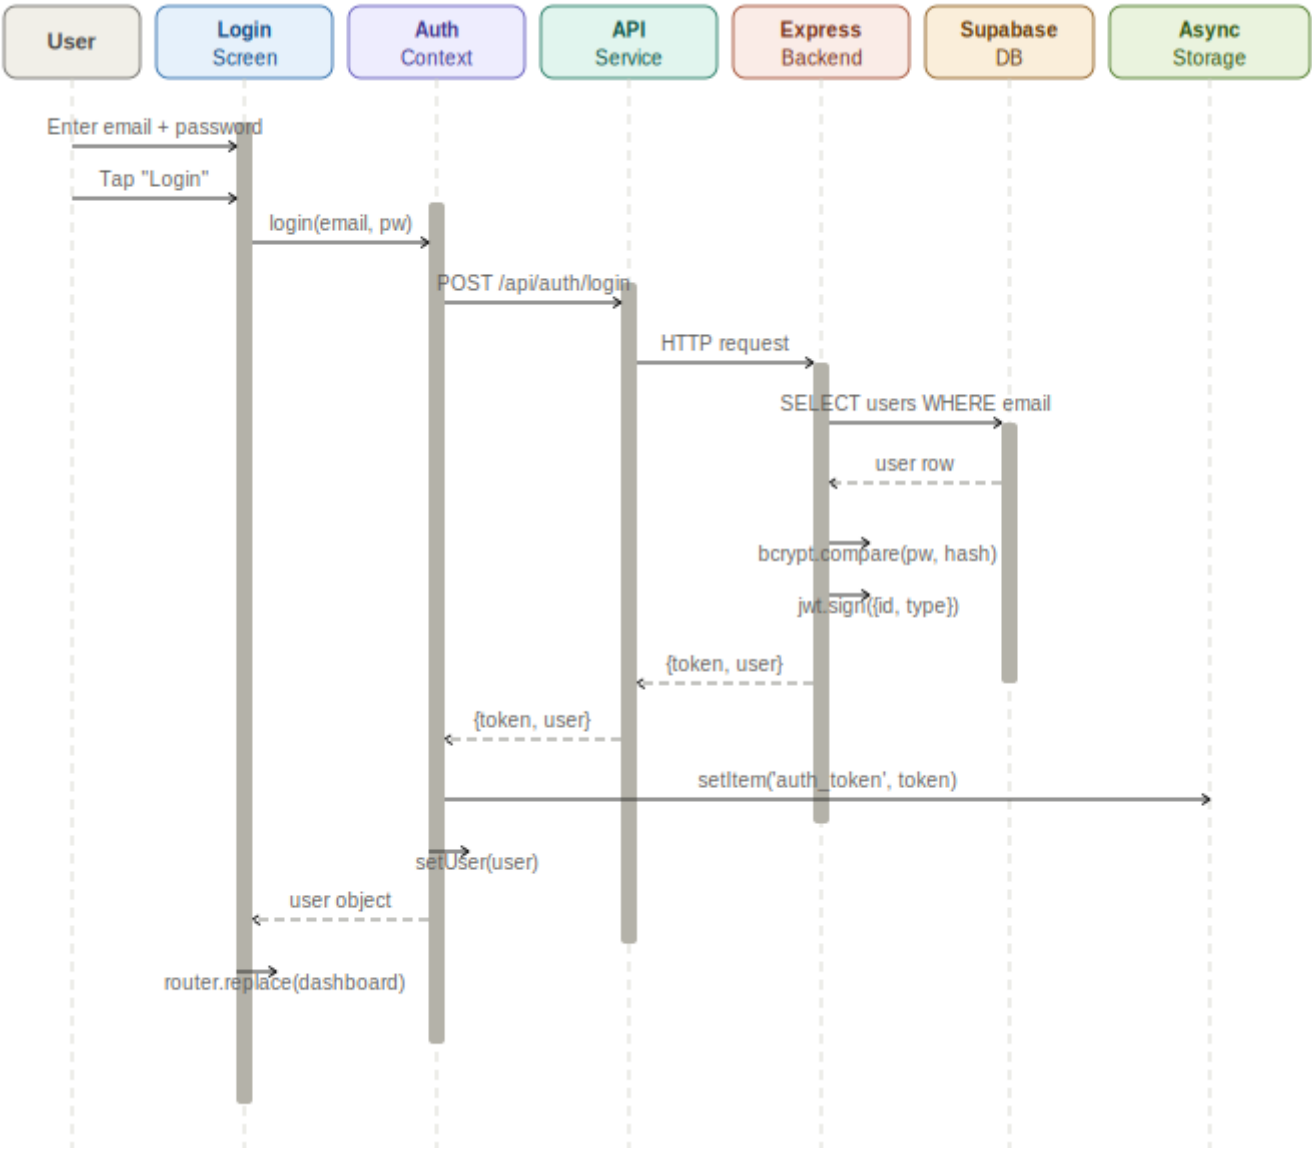

Diagram 3 — Sequence: Apply for Internship

Two-phase flow: CV upload to Supabase Storage (Phase 1) then application submission to DB (Phase 2).

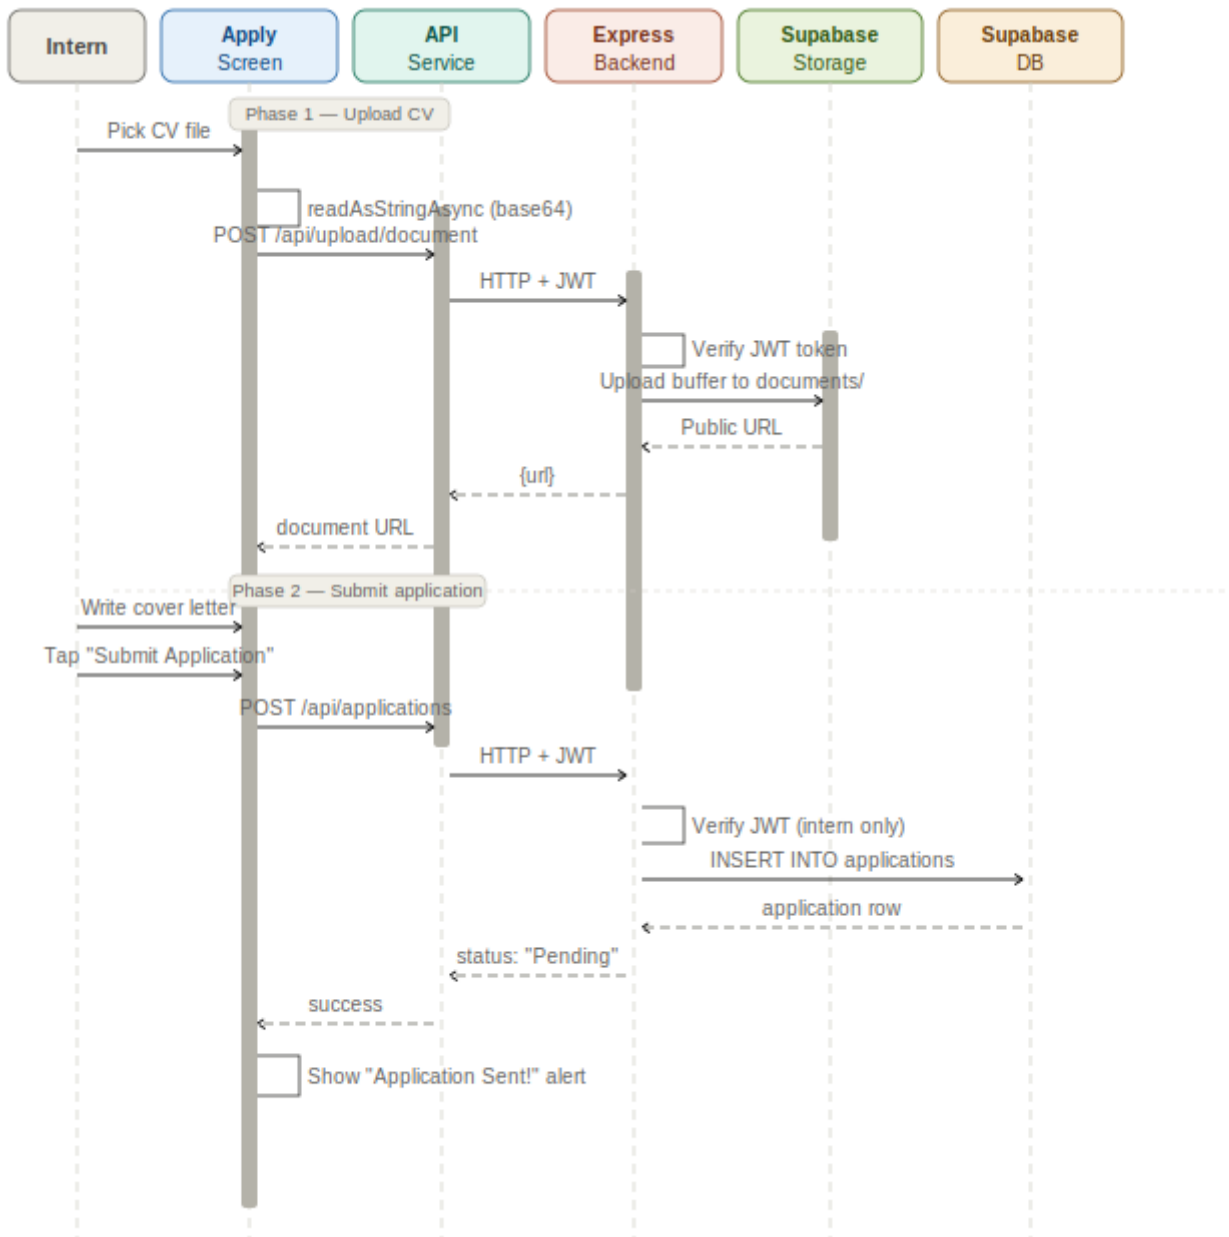

Diagram 4 — Sequence: Firm Reviews Applicant

Three-phase flow: load applicants → schedule interview (PATCH status) → open CV in browser.

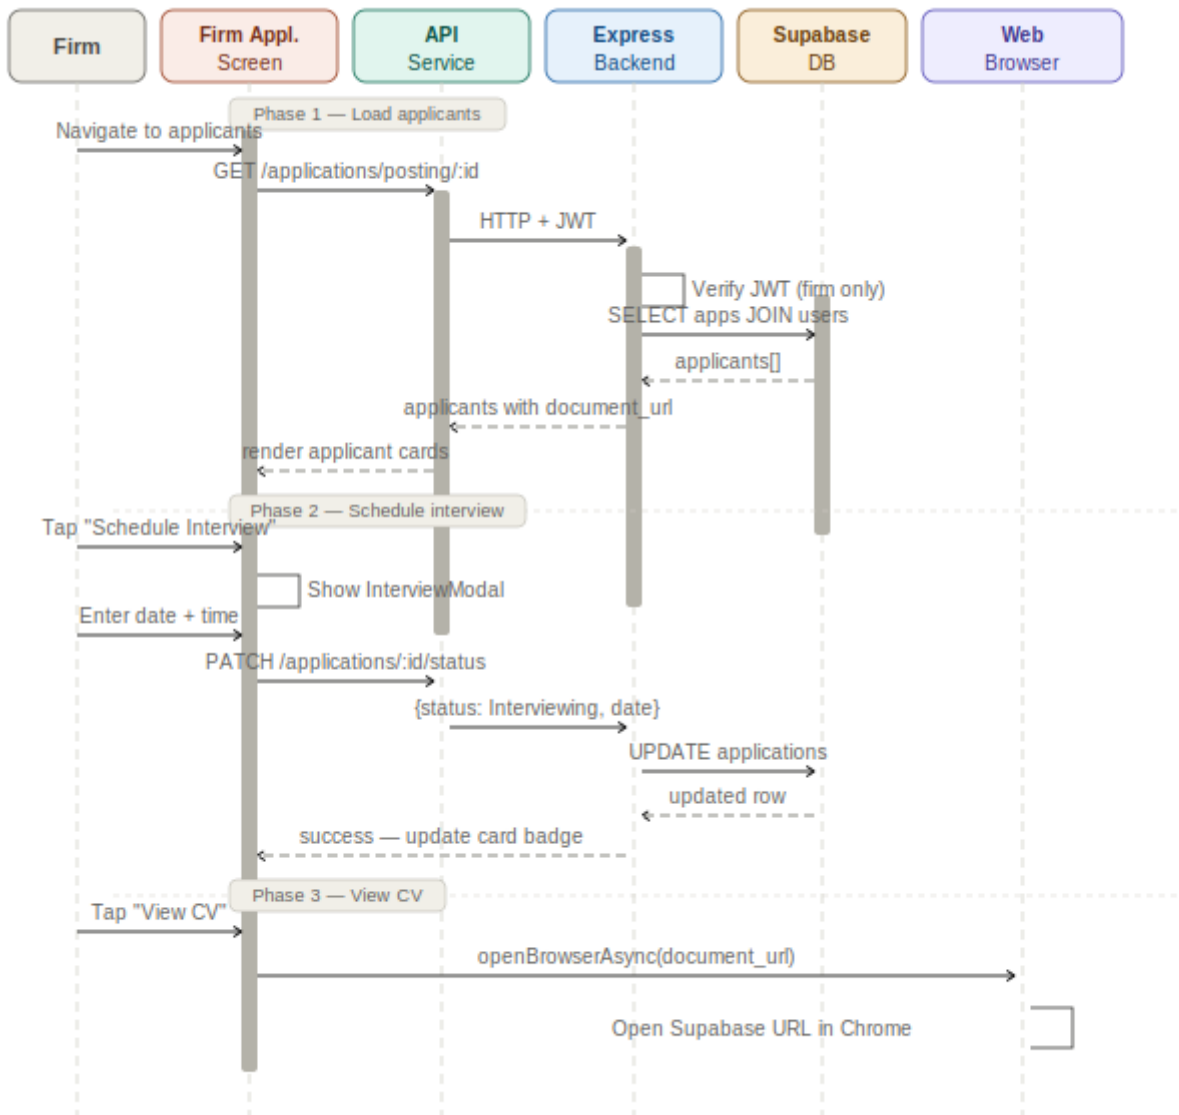

Diagram 5 — Class Diagram (Data Model)

All four entities (User, Internship, Application, SavedInternship) with every field, type, and relationship multiplicity.

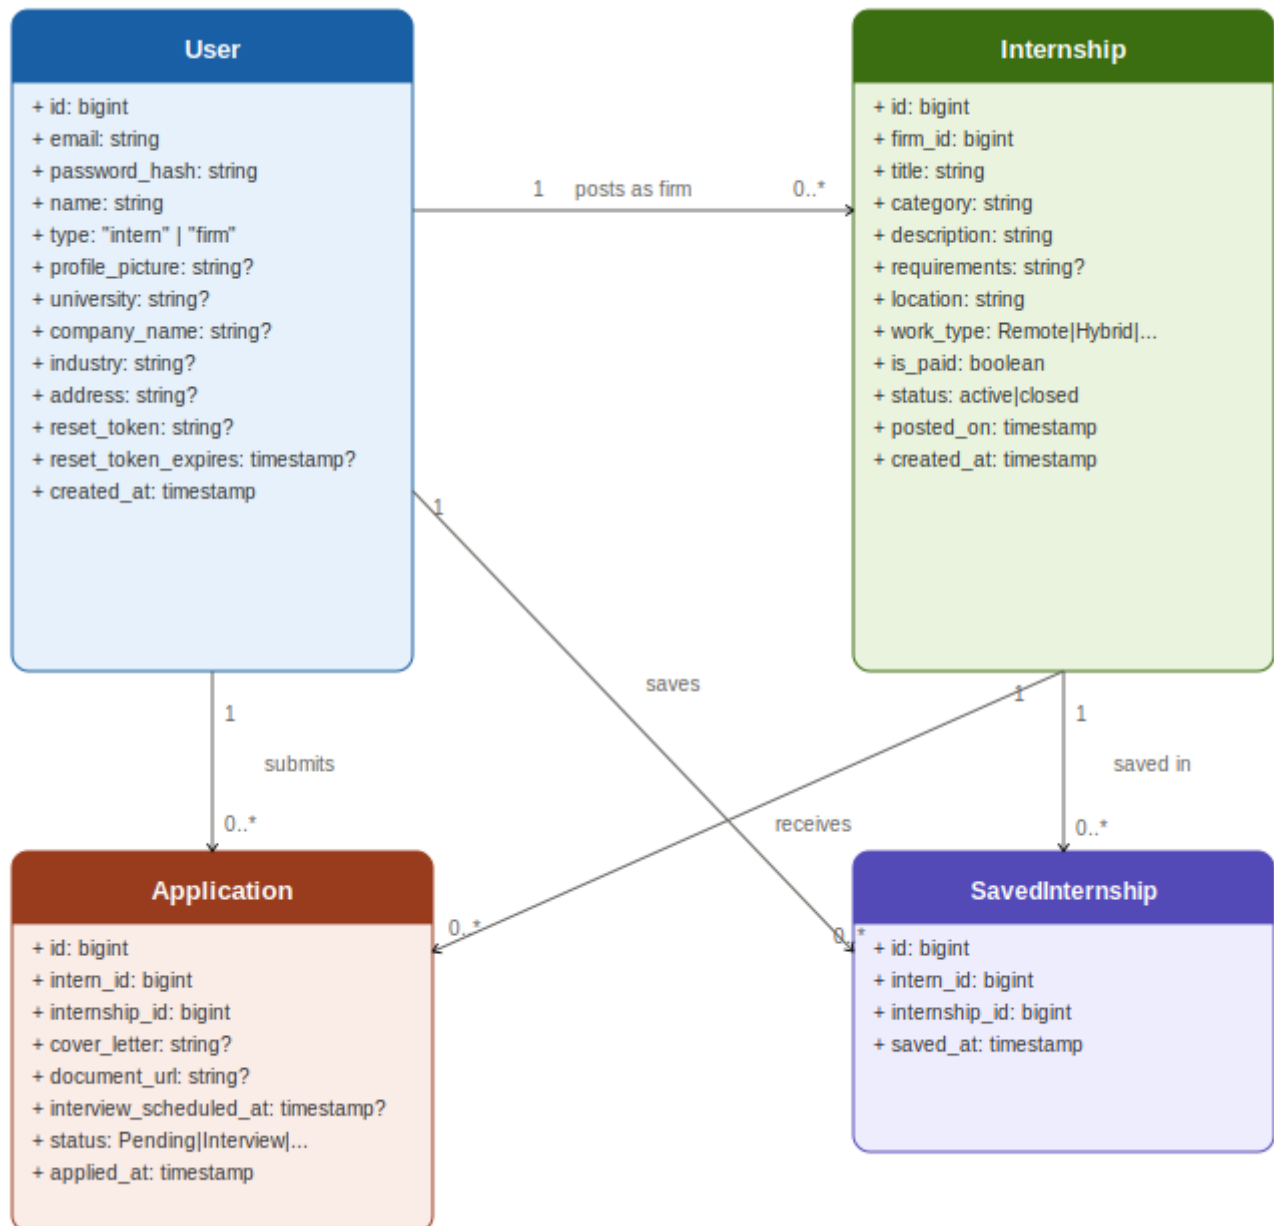

Diagram 6 — Component Diagram

Three packages: Mobile/Web Client, Backend Server (Docker), and Supabase Cloud with all components and connections.

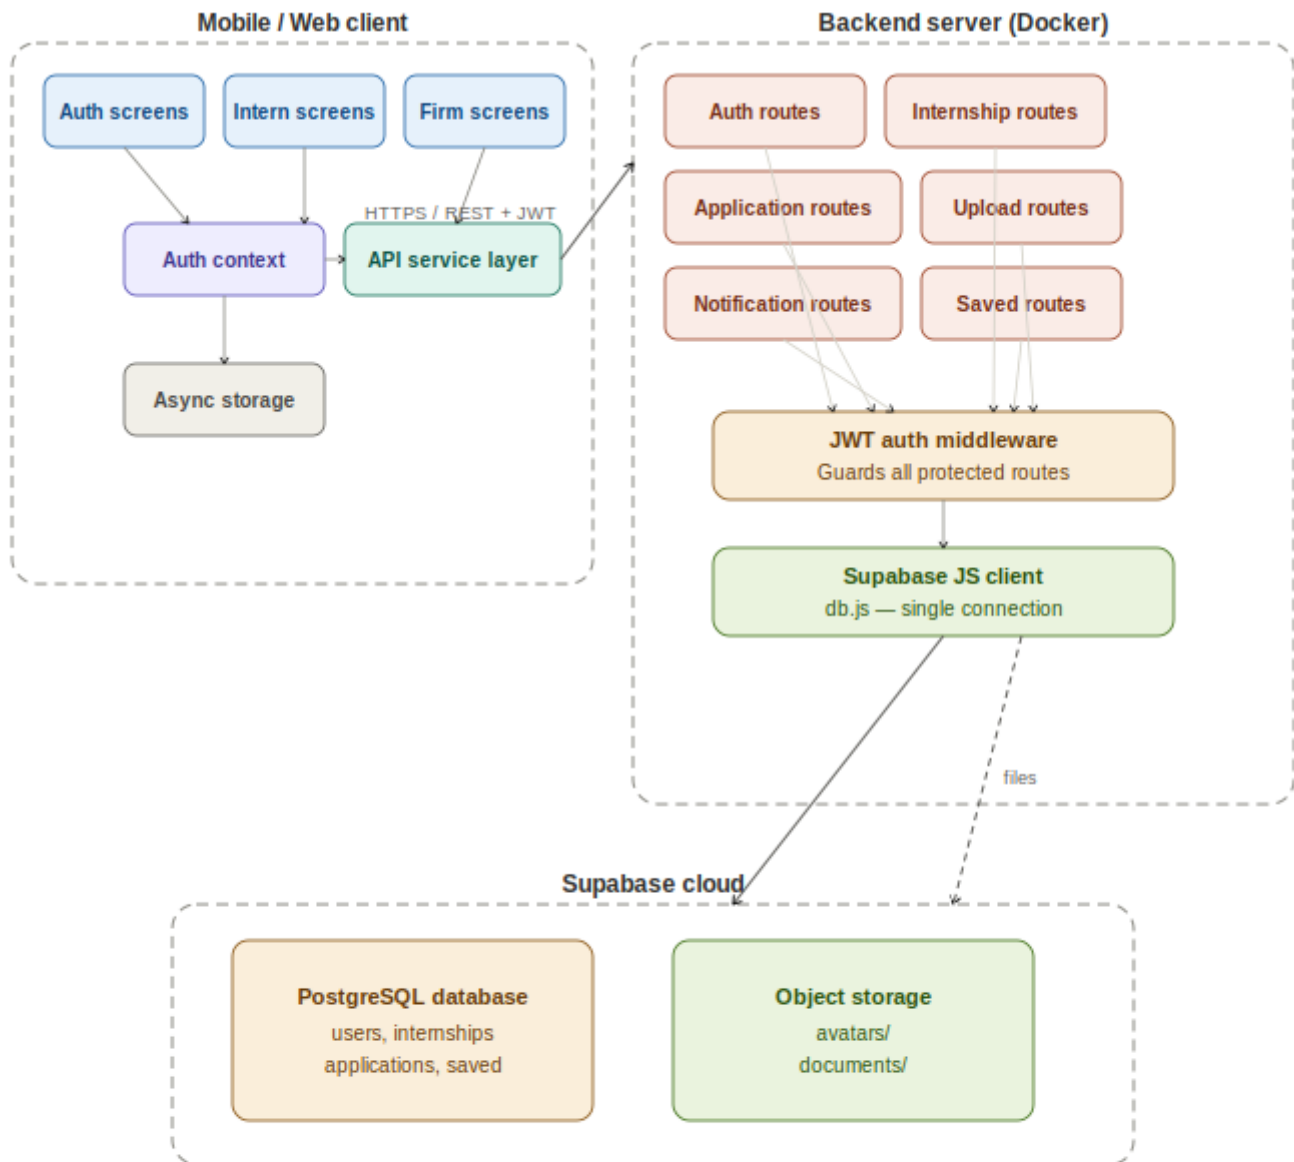

Diagram 7 — Deployment Diagram

User devices → Docker host (nginx:alpine + node:22-alpine containers) → Supabase Cloud (PostgreSQL + Object Storage).
